# **Pave-Tex**

## **Resurfacer**

*for paved driveways*

*Revive, seal  
and protect asphalt  
in one weekend!*

# Procedure

## 1 Prepare the surface

Clean the surface with a pressure washer (1500PSI) and remove any dirt with *TexNov's Surface Preparer*. Seal any cracks with *TexNov's Crack Filler*.

## 2 Apply the coating

Apply two coats of *Pave-Tex* coating with a brush or a 10mm roller. Leave 24 hours between both layers.

## Products needed

- *TexNov's* surface preparer
- *TexNov's* crack filler
- *Pave-Tex* textured coating

*Quick and easy application!*

*Increased protection from bad weather on new asphalt!*

*Restore original luster to your paved driveway!*
